SUBJECT INDEX TO VOLUME 4

A

- Adenosine, inhibition of mitogen mediated lymphocyte blastogenesis by, 419-427
- Adherence properties, of T-cells and B-cells of rabbit lymph system, 81-93
- Affinity labeling, of anti-lactose antibodies with bromoacetylaminolac dye in the dark, 499-506
- Allergic encephalomyelitis
  - induction of in guinea pigs, 353-359
  - inhibition of guinea pigs and rats, 387-397
- Amylase, presence in human urine, 111-121
- Antibodies
  - anti-lactose, affinity labeling of with bromoacetylaminolac dye in the dark, 499-506
  - anti-pneumococcus antisera, antibodies directed against calcium dependent and independent determinants, 537-552
  - colostral, binding to E. coli 086, 587-601
  - distribution on macrophage surface, 219-228
  - formation in pigeons after bursectomy, 309-324
  - interaction to two myelin proteins, 17-27
  - mast cell sensitizing antibodies in myasthenia gravis, 243-250
- Antibody response, by human serum albumin, 275-287

Antigens

- infected and transformed human diploid cells, changes in, 1-16
- spontaneous release of soluble HL-A antigens from platelets during conservation, 443-451
- T-cell associated antigens on MOLT 4 cultured cells, radioimmunoassay for, 579-586
- Anti-lactose antibodies, affinity labeling of with bromoacetylaminolac dye in the dark, 499-506
- Aspirin, inhibition of human platelet migration by, 139-148

B

B-cells

- in chicks, thymidine and testosterone incorporation by, 123-137
- human cultured, immunoglobulins on, 149-158
- in mice, mitogenic responses, 63-79
- in rabbits, adherence properties and mitogenic responsiveness, 81-93
- Blastogenesis
  - of human lymphocytes, adenosine inhibition, 419-427
  - of human lymphocytes, by endotoxin, 407-417
- Bromoacetylaminolac dye, affinity labeling of anti-lactose antibodies with in the dark, 499-506

Bursectomy, in newly hatched  
pigeons, effect on anti-  
body formation, 309-324

## C

Canine studies

See Dog studies

Carbamylation, blood group  
specific glycoproteins,  
effect of carbamylation of  
lysine  $\epsilon$ -amino groups on  
activity of, 553-564

Carbohydrate metabolism, in PHA  
stimulated human peripheral  
blood lymphocytes, 453-463

Carcinoma

glycoprotein associated with,  
lymphocyte stimulation by,  
251-273

monoclonal immunoglobulin,  
chemical studies of from a  
patient with carcinoma of  
the colon, 483-497

Chicken studies

hemolytic complement, optimal  
conditions for titration,  
337-351

polyclonal nature of IgM from  
dysgammaglobulinemic chick-  
ens, 529-536

thymidine and testosterone  
incorporation by bursal and  
thymic lymphocytes, 123-137

Common antigen, mimicry between  
mouse tissue and entero-  
bacterial common antigen,  
39-49

Concanavalin A, Moloney sarcoma  
tumor growth, enhancement  
by, 29-37

Contact sensitivity, in mice,  
measured with thymidine  
labeled lymphocytes,  
361-372

Cyclic AMP, regulation of immune  
response using, 99-110

Cyclic nucleotides, effect on DNA  
synthesis in mouse lymphoid  
cells, 51-62

## D

Diploid cells, human, infected  
and transformed, antigenic  
and enzymatic changes in,  
1-16

DNA synthesis

in human lymphocytes stimulated  
by phytohemagglutinin,  
373-385

in mouse lymphoid cells, effect  
of cyclic nucleotides on,  
51-62

Dog studies, neoplasia, role of  
regional lymph node in,  
325-335

## E

Encephalitogenicity

induction of allergic encephalo-  
myelitis in guinea pigs,  
353-359

inhibition of allergic ence-  
phalomyelitis in guinea  
pigs and rats, 387-397

of myelin basic protein in  
guinea pigs, effect of  
imidates on, 187-194

Endotoxin, blastogenesis of  
human lymphocytes by,  
407-417

Enzymes, infected and transformed  
human diploid cells,  
changes in, 1-16

E rosettes, stabilization using  
high molecular weight  
compounds, 179-186

Escherichia coli 086, colostral  
antibody binding to,  
587-601

Estradiol, receptors, quantitation  
of by radioimmunoassay,  
603-615

## G

Globulin, chlorambucil-bound anti-  
tumor globulin, endocytosis,  
229-242

## Glycoprotein

associated with mammary carcinoma, lymphocyte stimulation by, 251-273

blood group specific, effect of carbamylation of lysine  $\epsilon$ -amino groups on activity of, 553-564

## Guinea pig studies

allergic encephalomyelitis, induction of, 353-359

allergic encephalomyelitis, inhibition of, 387-397

encephalitogenicity of myelin basic protein, effects of imidates on, 187-194

## H

## HL-A antigens

alteration of antigenic site in situ, 465-476

spontaneous release of from platelets during conservation, 443-451

## Human serum albumin, antibody response by different forms, 275-287

## Human studies

antibody response by different forms of human serum albumin, 275-287

blastogenesis of lymphocytes, adenosine inhibition of, 419-427

blastogenesis of lymphocytes by endotoxin, 407-417

blood group specific glycoproteins, effect of carbamylation of lysine  $\epsilon$ -amino groups on activity of, 553-564

diploid cells, antigenic and enzymatic changes in infected and transformed cells, 1-16

immunoglobulins on cultured human lymphocytes, 149-158

lymphocyte stimulation, new micromethod using whole blood, 297-307

mammary carcinoma associated glycoprotein, 251-273

monoclonal immunoglobulin, chemical studies of from a patient with carcinoma of the colon, 483-497

myasthenia gravis, mast cell sensitizing antibodies in, 243-250

nascent DNA from phytohemagglutinin-stimulated human lymphocytes, 373-385

peripheral blood lymphocytes, alteration of HL-A antigenic site, 465-476

peripheral blood lymphocytes, carbohydrate metabolism in, 453-463

platelet migration, inhibition by aspirin, 139-148

progesterone, inhibitory effect of on phytohemagglutinin-induced transformation of peripheral lymphocytes, 519-527

salivary gland antigens in urine, 111-121

T-cell associated antigens on MOLT 4 cultured cells, radioimmunoassay for, 579-586

## I

IgD myeloma proteins, isolation of a  $V_H C_\lambda$  fragment on tryptic digestion of, 477-482

Imidates, effect of on encephalitogenicity of myelin basic protein in guinea pigs, 187-194

## Immune response

mitogenic and adjuvant activity of a methanol extraction residue of tubercle bacilli, on mouse lymphoid cells in vitro, 565-577

regulation using cyclic AMP and a thymic extract, 99-110

Immunoglobulins  
 on cultured human lymphocytes,  
 149-158  
 monoclonal, chemical studies of  
 from a patient with car-  
 cinoma of the colon,  
 483-497  
 polyclonal nature of IgM from  
 dysgammaglobulinemic  
 chickens, 529-536  
 Immunologic tolerance, in mice,  
 termination of immunologic  
 tolerance with tolerated  
 antigen complexed with  
 specific antibody, 159-177  
 Immunosuppressor T-cells, in tumor  
 bearing hosts, 201-217

## L

Lymphocytes  
See also B-cells; T-cells  
 human, blastogenesis by endo-  
 toxin, 407-417  
 human, new micromethod for  
 stimulation of using whole  
 blood, 297-307  
 human, inhibition of mitogenic  
 mediated blastogenesis of  
 by adenosine, 419-427  
 human, stimulation by a mammary  
 carcinoma associated glyco-  
 protein, 251-273  
 human cultured, immunoglobulins  
 on, 149-158  
 human peripheral, inhibitory  
 effect on phytohemaggluti-  
 nin-induced transformation  
 in, 519-527  
 human peripheral blood lympho-  
 cytes, alteration of HL-A  
 antigenic site, 465-476  
 human peripheral blood lympho-  
 cytes, carbohydrate metabo-  
 lism in, 453-463  
 in mice, mitogenic and adjuvant  
 activity of a methanol ex-  
 traction residue of  
 tubercle bacilli on, 565-577  
 nascent DNA from phytohemagglu-  
 tinin-stimulated human

lymphocytes, 373-385  
 neoplasia, role of regional  
 lymph node in, 325-335  
 thymidine labeled in mice,  
 measurement of contact  
 sensitivity with, 361-372  
 Lymphoma, endocytosis of chlor-  
 ambucil-bound anti-tumor  
 globulin following "capping"  
 in EL4 lymphoma cells,  
 229-242  
 Lysine, blood group specific  
 glycoproteins, effect of  
 carbamylation of lysine  
 ε-amino groups on activity  
 of, 553-564

## M

Macrophages, surface antibody  
 distribution on, 219-228  
 Mammary carcinoma, glycoprotein  
 associated with, lymphocyte  
 stimulation by, 251-273  
 Mast cell sensitizing antibodies  
 in myasthenia gravis,  
 243-250  
 Mimicry, between mouse tissue and  
 enterobacterial common  
 antigen, 39-49  
 Mitogenic response  
 of methanol extraction residue  
 of tubercle bacilli, on  
 mouse lymphoid cells  
in vitro, 565-577  
 of T-cells and B-cells of rab-  
 bit lymph system, 81-93  
 of T-cells and B-cells in  
 spleen of mice of varying  
 age, 63-79  
 Moloney sarcoma, enhancement of  
 tumor growth by concanavalin  
 A, 29-37  
 MOLT 4 cultured cells, human  
 T-cell associated antigens,  
 radioimmunoassay for,  
 579-586  
 Mouse studies  
 contact sensitivity measured  
 with thymidine labeled  
 lymphocytes, 361-372

- DNA synthesis in lymphoid cells, Nucleotides, cyclic, effect on effect of cyclic nucleotides on, 51-62
- endocytosis of chlorambucil-bound antitumor globulin following "capping" in EL4 lymphoma cells, 229-242
- immunosuppressor T-cells in tumor bearing hosts, 201-217
- mimicry between mouse tissue and enterobacterial common antigen, 39-49
- mitogenic and adjuvant activity of a methanol extraction residue of tubercle bacilli, on mouse lymphoid cells in vitro, 565-577
- mitogenic responses to T-cells and B-cells in spleens of mice of varying age, 63-79
- Moloney sarcoma tumor growth, enhancement by concanavalin A, 29-37
- termination of immunologic tolerance with tolerated antigen complexed with specific antibody, 159-177
- Murine lymphocytes, mitogenic responses in spleens of mice of varying age, 63-79
- Myasthenia gravis, mast cell sensitizing antibodies in, 243-250
- Myelin basic protein C-terminal end, 387-397
- encephalitogenicity of in guinea pigs, effects of imidates on, 187-194
- induction of allergic encephalomyelitis in guinea pigs using, 353-359
- Myelin proteins, antibodies, interaction of to, 17-27
- Myeloma proteins, isolation of a  $V_H C_\lambda$  fragment on tryptic digestion of, 477-482
- N
- Neoplasia, regional lymph node, role of in, 325-335
- P
- Phagocytosis, as a surface phenomenon, 429-442
- Phytohemagglutinin, nascent DNA in human lymphocytes stimulated by, 373-385
- Pigeon studies, surgical bursectomy in newly hatched period, effect on antibody formation, 309-324
- Platelets HL-A antigens, spontaneous release of from, 443-451 migration in humans, inhibition by aspirin, 139-148
- Progesterone, inhibitory effect of on phytohemagglutinin-induced transformation of human peripheral lymphocytes, 519-527
- Purine nucleotides, cyclic, effect on DNA synthesis in mouse lymphoid cells, 51-62
- Pyrimidine nucleotides, cyclic, effect on DNA synthesis in mouse lymphoid cells, 51-52
- R
- Rabbit studies antibodies, interaction of to two myelin proteins, 17-27 anti-pneumococcus antisera, antibodies directed against calcium dependent and independent determinants, 537-552 lymphoid cells subpopulations, adherence properties and mitogenic responsiveness, 81-93
- Radioimmunoassay estradiol receptors, quantitation of by radioimmunoassay, 603-615

- for human T-cell associated  
antigens on MOLT 4 cultured  
cells, 579-586
- Rat studies, inhibition of al-  
lergic encephalomyelitis,  
387-397
- Rosettes, stabilization using  
high molecular weight  
compounds, 179-186
- S
- Salivary gland antigens, presence  
in human urine, 111-121
- Salmonella typhimurium, contact  
angles and phagocytosis of,  
429-442
- Sarcoma  
enhancement of Moloney sarcoma  
tumor growth by concana-  
valin A, 29-37  
immunosuppressor T-cells in  
tumor bearing hosts,  
201-217
- Sheep studies, stabilization of  
red blood cell rosettes  
with high molecular weight  
compounds, 179-186
- Surface phenomena, phagocytosis  
of strains of Salmonella  
typhimurium, 429-442
- T
- T-cells  
in chicks, thymidine and tes-  
tosterone incorporation by,  
123-137  
E rosette test, 179  
human, antigens associated with,  
on MOLT 4 cultured cells,  
579-586  
human cultured, immunoglobulins  
on, 149-158  
in mice, immunosuppressor  
T-cells in tumor bearing  
hosts, 201-217  
in mice, mitogenic responses,  
63-79  
in rabbits, adherence proper-  
ties and mitogenic respon-  
siveness, 81-93  
Testosterone, incorporation by  
chick T-cells and B-cells,  
123-137  
Thymidine, incorporation by chick  
T-cells and B-cells,  
123-137  
Tubercle bacilli, mitogenic and  
adjuvant of a methanol ex-  
traction residue of tubercle  
bacilli, on mouse lymphoid  
cells in vitro, 565-577  
Tumor growth, enhancement of  
Moloney sarcoma growth by  
concanavalin A, 29-37
- U
- Urine, human, salivary gland anti-  
gens in, 111-121

## INSTRUCTIONS FOR PREPARATION OF MANUSCRIPTS FOR DIRECT REPRODUCTION

IMMUNOLOGICAL COMMUNICATIONS is a bi-monthly journal in the English language for the rapid communication of immunological information.

### Directions for Submission to IMMUNOLOGICAL COMMUNICATIONS

One manuscript suitable for direct reproduction (see Instructions for Preparation), carefully inserted in a folder, and two copies of the manuscript must be submitted.

### Reprints

Owing to the short production time for articles in this journal it is essential to indicate the number of reprints required upon notification of acceptance of the manuscript. Reprints are available in quantities of 100 and multiples thereof, in addition to the twenty (20) free copies provided to the author(s); a reprint price list will be sent to the author(s) with the notification of acceptance of the manuscript.

### Manuscripts should be mailed to:

Editorial Office, The Center for Immunology  
203 Sherman Hall, School of Medicine  
State University of New York at Buffalo  
Buffalo, New York 14214

### INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

*Since all the contributions are reproduced by direct photography of the manuscripts, the following instructions must be strictly adhered to. Non-compliance will result in the return of the manuscript to the author(s) and delay in its publication.*

### Typing Instructions

1. Manuscript must be typewritten, double spaced, on good quality white bond paper measuring at least 8 1/2 x 11 inches.
2. It is essential to use a black typewriter ribbon in good condition so that a clean and clear impression of the letters is obtained. Erasure marks, smudges, creases, etc., should be avoided. (Errors may be corrected by using white opaque correcting fluids or tapes).
3. All formulas and equations should be typed in or carefully prepared in permanent black ink, using drawing instruments.
4. The typing area of page 1, including the title, should be 5 1/2 by 7 inches and that of all other pages 5 1/2 by 8 1/2 inches. Make maximum use of the typing area.
5. Tables should be typed as part of the text but in such a way as to separate them from the text by a three-line space at both top and bottom of each table. The title "TABLE" (capitalized and followed by a Roman number) should precede the table and be centered on the page. Care should be taken that a table does not overlap onto the next page.
6. Drawings, graphs and other numbered figures should be drawn in black India ink (do not use blue ink) on a separate piece of white paper. Photographs should be glossy prints. Lettering set should be used for all labels on the figures or photographs; a typewriter may be used for labels. Captions for the figures should be

typed (single spaced) on a separate sheet, along the full width of the type page. The indication "FIGURE" should be capitalized and, with the figure's number (in Arabic numerals), centered above the caption. The numbers of the figures or photographs as well as the name(s) of the author(s) should be written in blue pencil on the back; the top of the picture should also be indicated on the back. The author(s) should indicate (with a blue pencil) the places in the text where the picture(s) should be inserted.

7. References (including footnotes) in the text will be numbered consecutively by numbers in parentheses. The full references (and footnotes) will be collected at the end of the text. The last names of all authors to any one paper, followed by their initials, shall be quoted. The title of the journal (Chemical Abstracts abbreviations), the volume number (underlined), the first page and the year should follow, in that order. Books should be cited similarly and include the publisher's name and location along with the year and edition of the book. Articles or chapters in books should be cited similarly and include the name of the editor(s) of the book and the page on which the article begins, as well as the volume number.

(journal): Thrasher, S. G., Doroszczak, N. and Cohen, S., J. Immun., 107:1394, 1971.

(book): Pressman, D. and Grossberg, A. L., The Structural Basis of Antibody Specificity. W. A. Benjamin, Inc., New York, 1968.

(article in a book): Milgrom, F., in International Convocation on Immunology, edited by N. R. Rose and F. Milgrom, p. 270, S. Karger, New York, 1969.

### Format of Manuscripts

1. The entire title should be in capital letters and centered on the width of the typing area, at least two inches from the top of the page. This is followed by a one-line space and then by the name(s) and address(es) of the author(s), in the following way:

#### AUTOIMMUNE RESPONSES TO THYROGLOBULIN IN THE RAT

T. J. Atkins and H. Z. Ginsberg  
Departments of Microbiology and Pathology,  
School of Medicine, State University of New York  
at Buffalo, Buffalo, New York 14214

2. The title and the name and address of the author(s) are followed, after a three-line space, by an abstract, comprising less than 10% of the length of the text of the article. The abstract must be typed single-spaced and headed "Abstract".
3. After a three-line space, the article itself commences, whenever possible subdivided into sections such as "Materials and Methods," "Results," "Discussion," "Acknowledgments" and "References." The headings should be centered, underlined, and separated by one extra line space from the typed material that precedes and follows it.
4. Each page of manuscript should be numbered lightly at the bottom of the sheet, with a blue pencil.
